SDS_m™ MANUAL

VERSATILE, CUSTOMIZABLE, COST-EFFECTIVE.

LT SHELVING, 3-PIECE ANTI-TIP ADA COMPLIANT TRACK - RETAIL

SDS_m ADVANTAGE

Spacefile's SDS_m Manual system is a highly flexible, cost effective solution for light and medium load applications. Efficient movement is achieved by simply grasping on to the handle and moving side to side. Designed for high traffic and heavy use, SDS_m carriages are engineered to endure the toughest conditions, no matter what the application. Advanced welded frame construction provides the highest degree of structural integrity, rigidity and durability compared to any other design. Large 3" solid steel wheels enable easy maneuverability and permanently sealed/lubricated ball-bearings ensure smooth long-lasting operation. SDS_m carriages are finished with powder coat paint, providing a durable, hard surface with superior performance qualities.

SAFETY FOREMOST

Unlike conventional systems, anti-tip devices are a standard feature on all Spacefile mobile systems. Spring-loaded foot stops/anti-drift mechanisms are available to prevent unwanted carriage movement.

VARIETY OF SHELVING OPTIONS & ACCESSORIES

SDS_m Manual systems are designed to accommodate any of Spacefile's shelving products as well as integrate with third party shelving and custom storage solutions. Other unique options include carriages with heavy-gauge steel covers for open, large item storage as well as multi-purpose art/storage racks. Spacefile manufactures a complete line of accessories and components that can be added or reconfigured to adapt to changing storage needs. Custom accessories are also available.

MULTIPLE TRACK AND DECKING CHOICES

Spacefile's innovative and extensive line of track and decking configurations provide an ideal solution for any application and facilitate installation on virtually any surface. SDS carriages share common tracks and can be installed/relocated without requiring any modifications. ADA complaint ramps and seismic track options are available.

VARIOUS COST-EFFECTIVE LOCKING CONFIGURATIONS

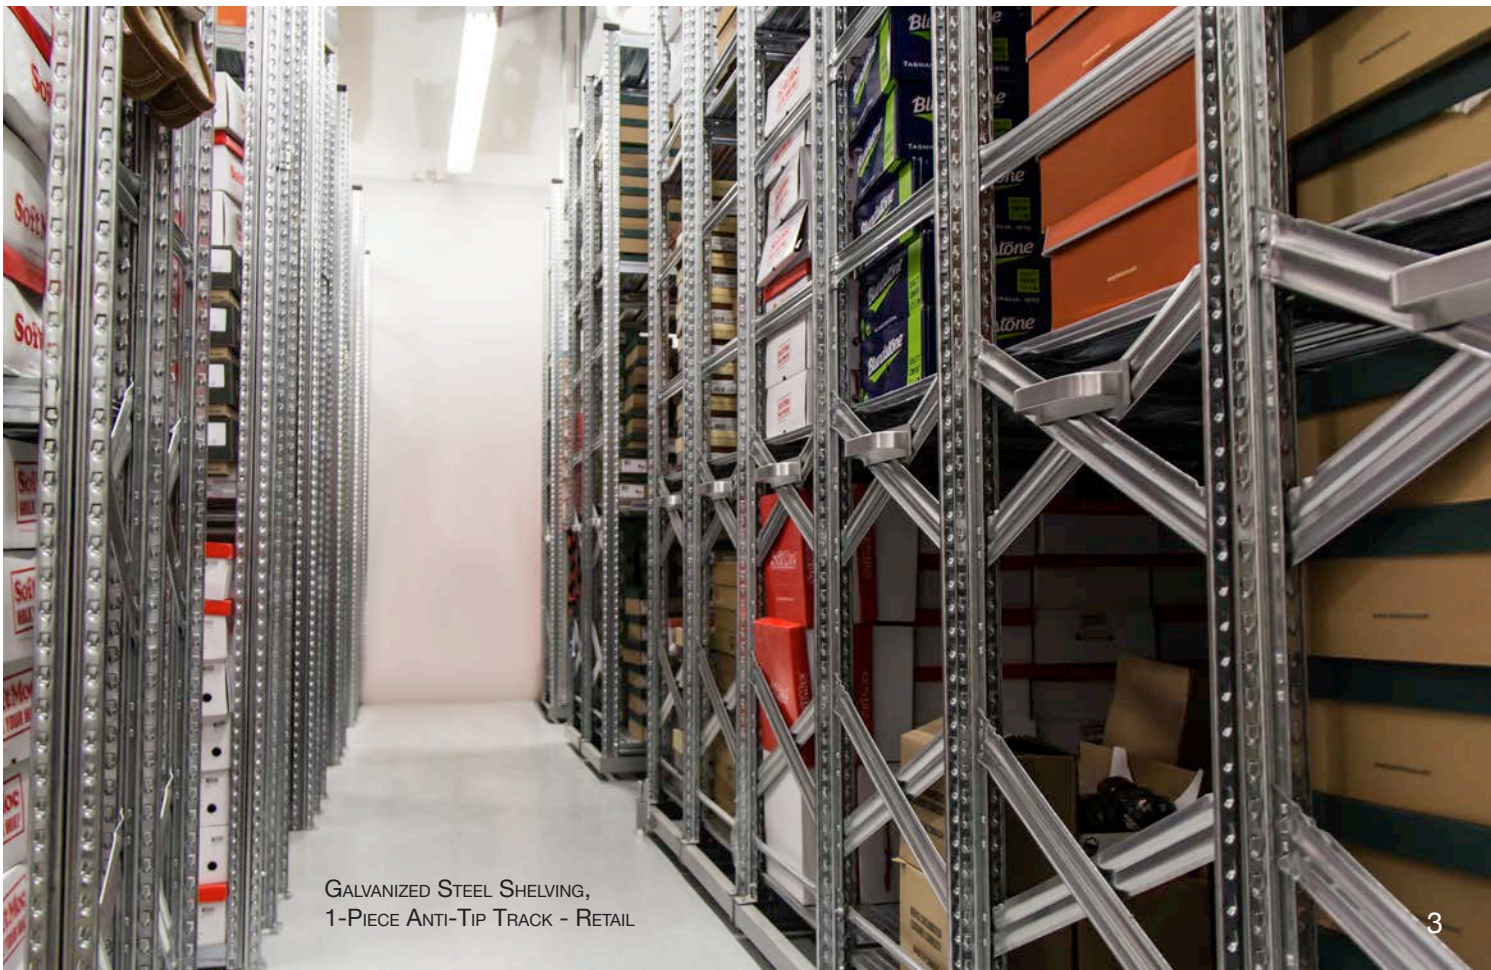

A diverse selection of lockable configurations are available to meet virtually any security criteria. Locking devices include hub/handle locks, waist high plunger locks, tambour doors, hinged doors, flip down doors, padlocks and various other accessories (HIPPA & PIPEDA compliant configurations are available).

DECORATIVE & FUNCTIONAL ENHANCEMENTS

Spacefile has a diverse selection of end panels that may be integrated with any of our systems. Laminate end panels are available in over 20 standard finishes as well as custom options. Additional choices include Spacefile's unique steel pegboards, dry-erase boards, glass, acrylic, steel and custom materials.

ENVIRONMENTALLY FRIENDLY

Spacefile is committed to designing and manufacturing long-lasting, environmentally friendly products. SDS_m Manual carriages are constructed primarily from sheet metal with an average of over 40% recycled content. Spacefile products may contribute to LEED accreditation. Powder coat paint emits negligible VOC's (volatile organic compounds) for a cleaner, healthier indoor environment.
