SPACEFILE CANTILEVER FEATURES

LAMINATES

Variety of laminates available to fully integrate the system into your space.

SLOPING SHELVES

30 or 45 degree angle ideal for magazines, brochures, and catalogues.

SHELVES

Variety of shelves available to fully customize your system.

Face Front Periodical Shelf

The periodical display consists of standard parts that are interchangeable. The display shelves cantilever from standard shelving uprights. The system displays the fronts of the periodicals while also accommodating black issues. Each display unit is of fixed shelf construction. Each display level consists of a horizontal sloped shelf which is 9" in depth, a corresponding vertical sloped back 12" tall, and a nonskid, telescoping angled, transparent supports, which keep the periodicals pressured against the backs. The display shelves and backs are sloped 8 degrees. Adjustable shelving levels also allow for the placement of periodicals in any lateral position along the entire length of the shelf.

Single Tier Video and Paperback Shelf

The sides are manufactured from 16 gauge steel and the back and bottom of 20 gauge steel. This shelf is constructed with a 7 degree back slant. This shelf has the capacity to accommodate a zig zag shelf, allowing a better display of books or videos.
