

SDSe Electrical Assist

A state-of-the-art logic system for high-density mobile storage

Spacefile Storage Solutions

Features & Benefits:

- User friendly controls
- ADA Compliant ramps for safe access to the system.
- Overhead scissor arms for power and communication wires
- Multiple safety features that provide safe and reliable operation for years.
- Available with UPS battery backup for power failures
- Systems available up to 60 feet long
- The controller-monitored current draw ensures ultimate safety

Of Storage Innovation

SDSe Electrical Assist

Spacefile's electrical storage system has multiple security features, adjustable program settings and safety standards that exceed industry requirements. Spacefile's SDSe provides reliable, worry-free operation for a lifetime of use. The SDSe system is a conglomeration of the highest quality components on the market, setting a new industry benchmark for safety, strength and durability.

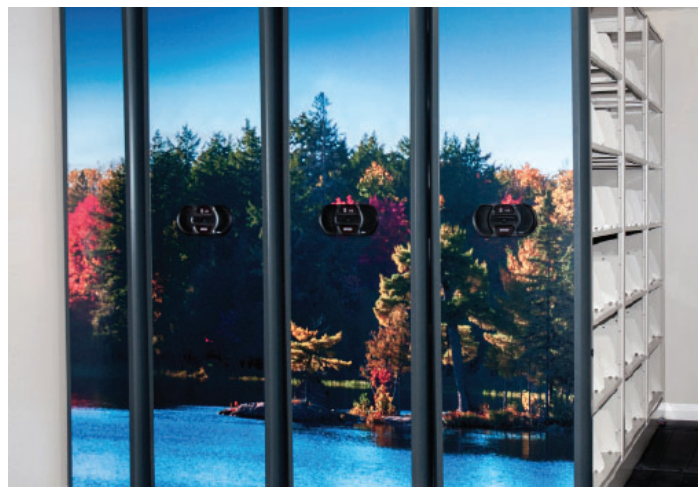

Safety Solved!

There are two types of safety considerations when operating a mobile high density storage system, Active and Passive. Passive is perhaps the most important because no action is required in order to remain safe. Active allows the operator the opportunity to use the feature when needed.

Our electrically powered mobile carriages have two critical Passive safety features built-in as standard, Photosweep Sensors and Motor Current Draw sensors. We also have multiple add-on options available.

SDSe Electrical Assist - safe, accessible, intelligent

Safety Options:

- Aisle Entry Sensors – with Auto-reset
- Fire Park – integrated with fire alarm system
- EDS Sensors – heat and motion sensors
- Cross-aisle sensors
- PIR – motion sensors
- Kick Tape sensors

SDSe Options:

- Webservice connectivity
- Aisle Lights
- Emergency Battery Pack
- Card Readers
- Digital Keypad
- Emergency Power Reset
- Power Booster

About Spacefile

Spacefile International Corp. is a world leader in high-density storage, providing insights into how to successfully integrate mobile, static and customized modules into comprehensive storage solutions.

Our designs showcase ways to increase storage up to four-fold, with North American built products of uncompromising quality, attention to detail and best-in-class value. We are a North American-based manufacturer located in Toronto, with extensive experience in retail, corporate, library, museum, healthcare, government, industrial, and athletic applications.
